

Organization of the class „Geometry“ (V3D4, SS20):

The class will be held online up to further notice.

Registration: Mandatory on e-campus, using the registration password for the class which you got from the BaMa office.

There will be online lectures during the hours reserved for the class. To follow the lectures you need a pc, laptop, tablet or smartphone with a loudspeaker and microphone (if you want to ask questions and for the exercises) and an internet connection. No special software is required.

There will be exercises for the class. The solutions should be uploaded on e-campus. Please make sure that you have the possibility to upload your solutions in pdf format. e-campus restricts the size of files you can upload. Taking a picture of your homework solution and uploading the picture is not an option in general.

The class will follow the textbook by John Lee (second edition) rather closely. The book was chosen because it is very detailed.

The lectures will be posted on e-campus. All additional information, for example how to access the lectures will also be posted on e-campus.

Ursula Hamenstädt
