

Young Women in Topology

Date: Friday, June 25 to Sunday, June 27, 2010

Location: Hausdorff Research Institute for Mathematics, Bonn

Organization: Graduiertenkolleg 1150 Homotopy and Cohomology

This is the first in a new series of weekend-long workshops aimed in particular at female master and PhD students and postdocs in topology.

Program

The workshop centers around a series of three lectures

by **Brooke Shipley** (University of Illinois at Chicago) on **Algebraic models for rational equivariant stable homotopy theories**.

Shipley's lectures will be complemented by shorter talks of the participants, a poster exhibition and ample time for discussion.

Financial support for female participants is available. If you would like to attend the workshop, or have further questions, please contact Mrs. George at GRK1150@math.uni-bonn.de
